

Clinical Data Management, Inc. Announces TraumaBase Version 7 Release

EVERGREEN, CO — February 7, 2007 — Today at Corporate Offices, Clinical Data Management, Inc. (CDM) announced the immediate availability of Version 7 of TraumaBase Trauma Registry software to hospitals nationwide. TraumaBase Version 7 is a collection of selected features driven by client feedback and is part of CDM's commitment to deliver state of the art advances in trauma registry software for Trauma Programs dedicated to Performance Improvement, Trauma Prevention and Research. Version 7's new features include instant access to key information, a visible option list during data entry, drill down reporting, the ability to create reports in a PDF format and direct access to CDM Technical Support with an optional email function.

TraumaBase 7 Enhanced Functionality

“As a manager, I was impressed with the increased staff satisfaction using this product,” said Phyllis Uribe, Trauma Program Supervisor at Swedish Medical Center. Swedish Medical Center-HealthONE is a Level I Trauma Center that served as one of the Version 7 beta test sites. “I personally love the easy report writing and data analysis with TraumaBase 7. Once again, CDM has put out a trauma registry system that is flexible and customizable to meet our imagination.”

Karin Whinery, Trauma Data Specialist at Swedish affirms her Supervisor's impressions of Version 7. “The point and click reporting and then click and graph features are so easy to work with even timid users are not afraid to get in and play around with the reports.” Karin admits that she too likes to “play” with the reports. “It's actually fun. All of us here think it's fabulous!” Karin has been working with TraumaBase since the DOS version and says that she

thinks this is the best version yet. She added, "CDM support staff are the nicest and friendliest I have ever worked with in my IT career. They never talk down to me and are always extremely helpful. All the CDM staff deserves kudos."

TraumaBase 7 Streamlined Installation

The streamlined installation and conversion of TraumaBase Version 7 took less than a week at the Yale New Haven Hospital, Level I Trauma Center in New Haven, CT. "We couldn't have expected it to go any smoother," Calvin Norway, Medical Information and Technical Systems Coordinator said about the process of installation, conversion, testing and the system going live which took six days. Calvin, who has supported and worked with a lot of hospital software applications, said that he has never had a system progress from testing to go live so smoothly. "And Version 7 has the same stability and customization capabilities as Version 6 which we really like. We're extremely happy with CDM's products."

Key Features in Version 7:
